

Specifications of accessories for trough-type cable trays

Article Overview

Trough-type cable tray accessories include fittings, supports, and hardware designed to meet ANSI/NFPA, ASTM, and NEMA standards, ensuring safe, durable, and flexible cable management.

Types of Accessories

Trough-type cable tray systems use a variety of accessories to accommodate changes in direction, elevation, and support requirements:

- Bends and Elbows: Allow horizontal or vertical changes in cable routing while maintaining proper bend radius to prevent cable damage.
- Tees and Crosses: Facilitate branching of cable runs in multiple directions.
- Drop-Outs: Enable cables to exit the tray at specific points without disrupting the main run.
- Supports and Hangers: Include brackets, clamps, and hanger rods to secure trays to walls, ceilings, or structural beams.
- Splice Plates and Connectors: Join straight sections of trays, ensuring structural continuity and load-bearing capacity.
- Expansion Joints: Compensate for thermal expansion and contraction in long cable runs.
