

Stainless Steel Channel-Type Corrosion-Resistant Cable Trays

Overview

Stainless steel cable trays have sturdy structure, resist rust and they are specified for cable containment and cable support in oil, gas, petroleum, offshore, marine and a wide range of applications. Stainless steel cable trays are made of 304, 316 grade stainless steel, which are designed into channel style, ladder style, perforated style. SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/ BS EN. T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). The choice of material for any particular installation depends on the installation environment. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. " Unlike paint or galvanized coatings that can chip, this layer fights rust and even repairs itself in the presence of oxygen. Extreme Hygiene: The surface is smooth and non-porous.
