

Steel ladder-type cable tray sales price

Article Overview

Steel ladder-type cable trays typically range in price depending on material, load capacity, and length, with hot-dip galvanized trays priced per 2.4-meter section and stainless steel options costing more for industrial-grade applications.

Pricing Overview

- **Hot-Dip Galvanized Steel Ladder Trays:** Standard lengths of 2.4 meters are commonly used, and prices are calculated per tray section. Fittings such as elbows, tees, and reducers are priced per piece or unit, depending on the configuration and manufacturer .
- **Stainless Steel Ladder Trays (304 Grade):** These are more expensive due to corrosion resistance and industrial-grade construction. They feature tubular rungs connected to side rails via cold swaging, providing structural and electrical integrity. Prices vary based on load depth, width, and rung spacing .
- **Heavy-Duty vs Light-Duty:** Heavy-duty commercial trays designed for large power cables or industrial environments cost more than light-duty trays intended for smaller cable loads .

Factors Affecting Price

- **Material:** Hot-dip galvanized steel is less expensive than stainless steel, while aluminum trays are generally lighter and may have different pricing.
- **Load Capacity:** Trays designed to carry heavier cables or higher volumes of wiring are priced higher.
- **Length and Width:** Standard lengths are usually 2.4 meters, but custom lengths or wider trays increase cost....
