

Supply and Demand Information for Multi-hole Cable Trays

Article Overview

The global demand for multi-hole (perforated) cable trays is growing steadily, driven by industrialization, data center expansion, and infrastructure projects, with supply influenced by steel and aluminum availability and regional manufacturing capacity.

Market Demand Overview

Multi-hole cable trays, often categorized as perforated trays, are increasingly preferred for their enhanced ventilation, heat dissipation, and suitability for sensitive electrical environments. The global cable tray market is projected to grow from approximately \$5.4 billion in 2025 to \$5.73 billion in 2026, with a CAGR of 6.1% . Perforated trays are witnessing faster growth than solid trays due to their ability to support organized cable management in commercial, industrial, and IT infrastructure projects . Key demand drivers include:

- Data center proliferation, requiring efficient cable routing and cooling solutions .
- Industrial automation and electrification, which increase the need for structured cable management .
- Construction sector expansion, particularly in Asia-Pacific and North America, where large-scale infrastructure projects are underway .
- Energy efficiency and sustainability trends, prompting adoption of lightweight aluminum trays alongside traditional steel options .
