

Sweden sells optical splitters

Article Overview

Sweden offers a variety of optical splitters for both consumer and professional applications, available through online retailers and specialized manufacturers.

Consumer-Grade Optical Splitters

For home audio and entertainment setups, Toslink optical splitters are widely available. These devices allow a single digital audio signal to be split into two outputs without compromising sound quality, ideal for connecting multiple audio systems or recording devices simultaneously. Retailers like Elgiganten sell Toslink splitters suitable for home theater enthusiasts and audio professionals . Price comparison sites like Pricerunner list multiple models, allowing consumers to compare features and costs across 20 different products . Additionally, Wisi offers optical 2-way splitters compatible with standard fiber optic cables for home or small-scale installations .

Professional and Network Optical Splitters

For telecommunications and fiber network applications, PON splitters are used to connect multiple users to a single fiber line. Companies like Micropol provide passive fiber optic splitters in 19" ODF racks, wall boxes, or standalone enclosures. These splitters are customizable, ID-marked, and come with measurement protocols to ensure optimal performance in TV distribution and other fiber optic networks .
