

The H3C1310 optical module is a single-mode optical module

Overview

This H3C® SFP-XG-LX-SM1310 compatible SFP+ transceiver provides 10GBase-LR throughput up to 10km over single-mode fiber (SMF) using a wavelength of 1310nm via an LC connector. It can operate at temperatures between 0 and 70C. A 1310nm optical module lets you move data efficiently through fiber optic communication networks. As part of the O-band (1260–1360 nm), it balances low dispersion, stable performance, and cost efficiency. This makes it widely adopted in data centers, enterprise backbones, and metro access. A 1310nm single mode fiber optical transceiver is one of the most widely used optical transceivers in modern fiber-optic networks, especially for short-to-medium distance transmission over single-mode fiber. 953Gbps (10GBASE-LW) over single mode optical fiber. Buy used and refurbished server parts at cmicomputer with same-day handling on most items and free shipping! We ensure quality products with warranty. Order now! Condition:Refurbished. It provides 1GbE fiber connectivity with maximum 10km transmission distance.
