

The code for a 6-core optical fiber cable from China Telecom is

Article Overview

For a 6-core optical fiber cable, the standard TIA-598-C color sequence is: Blue, Orange, Green, Brown, Slate, White.

Fiber Color Sequence

According to the TIA-598-C standard, which is widely adopted by China Telecom and other manufacturers, the first six fibers in a multi-fiber cable are color-coded as follows :

- Fiber 1 - Blue
- Fiber 2 - Orange
- Fiber 3 - Green
- Fiber 4 - Brown
- Fiber 5 - Slate (Gray)
- Fiber 6 - White

This sequence ensures consistent identification during installation, splicing, and maintenance. Each fiber is numbered in order, and the color provides a visual cue to prevent miswiring or cross-connections.

Additional Notes

- Outer Jacket: China Telecom cables may use a standard yellow jacket for single-mode OS2 fibers or orange for multimode OM1/OM2, following TIA-598-C conventio...
