

Trapezoidal cable tray support arm specifications

Article Overview

Trapezoidal cable tray support arms are prefabricated suspension systems designed to securely support cable trays, offering high strength and corrosion resistance.

Key Specifications

Material and Construction: Trapezoidal support arms are typically made from stainless steel (A316/A4), providing excellent corrosion resistance for both indoor and outdoor environments. Pre-galvanized steel options are also available for cost-effective protection against rust and environmental exposure . **Dimensions:**

- Standard widths for trapeze support brackets can accommodate cable trays up to 100mm wide, though larger sizes are available depending on manufacturer specifications .
- Cantilever arms, which serve a similar function, are available in lengths such as 500mm, allowing for flexible mounting and support of cable trays at varying distances from walls or structural supports .
- Load Capacity:** These support arms are engineered to handle the mechanical loads of cable trays, including the weight of cables and any additional fittings. The exact load rating depends on the material, arm length, and mounting configuration, but stainless steel construction ensures high strength and durability .
- Installation and Mounting:**
 - Trapezoidal support arms are pre-assembled, reducing installation time and ensuring consistent alignment.
 - They can be mounted from ceilings, walls, or structural beams using threaded rod...
