

# Tunisian Liquid-Cooled Switch SFP

## Overview

The JS-SM5510-A2C SFP+ transceivers are high performance, cost effective modules supporting data rate of 10Gbps and 120km transmission distance with SMF. The transceiver consists of three sections: a Cooled EML laser transmitter, a APD photodiode integrated with a trans-impedance preamplifier (TIA). Cisco is actively innovating in direct-to-chip liquid cooling for high-performance switches, laying the groundwork for solutions that will enable seamless and scalable AI at unprecedented densities. Today's rack switches are rapidly approaching their thermal limits with the jump to 400G, 800G, and. Discover multi-gigabit Ethernet switches with 2. 5G and 10G ports for blazing-fast network speeds. Explore managed features, PoE support, and compact designs. Discover how active cooling solutions for optical transceivers. Liquid cooling technology, leveraging its higher thermal conductivity efficiency and energy-saving advantages, has been introduced into the optical module field, becoming a key direction for addressing the bottleneck of high-power heat dissipation. The Firmware IDs for older versions of the firmware can typically be found in Appendix A.
