

Turkmenistan Outdoor Distribution Box Specifications

Article Overview

Outdoor distribution boxes in Turkmenistan are typically made from corrosion-resistant materials like 304 stainless steel, rated IP66-IP67 for water and dust protection, and designed for robust outdoor electrical applications.

Material and Construction

Outdoor distribution boxes are commonly constructed from 304 stainless steel, which provides excellent rust resistance, corrosion resistance, high temperature tolerance, and mechanical strength, making them suitable for harsh outdoor environments in Turkmenistan . Some boxes are also available in weatherproof metal or plastic enclosures depending on the application .

Environmental Protection

- **IP/NEMA Ratings:** Boxes are rated IP66 or IP67, ensuring protection against dust and water immersion, suitable for wet or dusty outdoor locations .
- **Temperature Range:** Certain models can withstand extreme temperatures from -50°C to +60°C and relative humidity from 30-95% without condensation .
- **Weatherproofing:** Compliance with NEC Article 312 and UL 50/50E standards ensures rain-tight and durable enclosures for outdoor installations .
