

Types and Prices of Cable Tray Tees

Article Overview

Cable tray tees are available in equal and unequal types, for light, medium, and heavy duty systems, with prices typically ranging from £20 to £150 depending on size, material, and finish.

Types of Cable Tray Tees

1. Equal Tees: These tees have all three branches of the same width, ideal for symmetrical cable splits in a system . 2. Unequal Tees: These have one branch narrower than the other two, suitable for connecting a smaller cable run to a main tray . 3. Crossovers: While not strictly tees, crossovers allow two cable runs to intersect smoothly and are often used alongside tees for complex layouts . Duty Ratings:

- Light Duty: For smaller cable loads, typically in office or residential installations .
 - Medium Duty: Common in commercial buildings, supporting moderate cable weight .
 - Heavy Duty: Designed for industrial or high-capacity installations, supporting large bundles of cables .
- Materials and Finishes:
- Mild Steel Pre-Galvanised (PG): Standard, cost-effective option .
 - Mild Steel Hot-Dip Galvanised (HDG): Offers enhanced corrosion resistance .
 - Stainless Steel Grade 1.4404 (316L): High corrosion resistance for harsh environments, available to order .
- Sizes: Widths range from 50mm to 900mm, with depth and height options varying by manufacturer .
