

US Multimode Indoor Optical Cable Prices

Article Overview

Multimode indoor optical cables in the US currently range from approximately \$0.35 to \$3.13 per foot, depending on fiber type, strand count, and plenum rating.

Price Ranges by Fiber Type and Strand Count

- OM1 (62.5/125 μm): Typically \$0.39–\$1.65 per foot for 6–12 strand indoor plenum cables, with bulk options slightly lower and pre-terminated assemblies higher in cost .
- OM2 (50/125 μm): Prices are similar to OM1, generally \$0.76–\$1.25 per foot for 6–12 strand indoor/outdoor plenum-rated cables .
- OM3 (50/125 μm , laser-optimized): Commonly \$0.76–\$3.13 per foot depending on strand count, plenum rating, and armored or breakout construction .
- OM4 (50/125 μm , laser-optimized): Indoor plenum-rated 6–48 strand cables range from \$0.83–\$2.97 per foot, with pre-terminated assemblies costing \$602 for a 48-strand 25-foot assembly (~\$24/ft equivalent) for high-density applications .
- OM5 (50/125 μm , wideband multimode): Typically available as pre-terminated assemblies, starting around \$4 per 4-fiber indoor cable .

Factors Affecting Pricing

- Strand Count: Higher strand counts (24, 48, 72 fibers) increase per-foot cost due to more glass fibers and larger jacket diameters .
- Plenum vs Riser Rating: Plenum-rated cables (OFNP) are more expensive than riser-rated (OFNR) due to fire safety compliance .
- Pre-Terminated vs Bulk: Pre-terminated assemblies reduce installation labor but increase per-foot cost significantly compared to bulk cable .
- Indoor/Outdoor Capability: Cables rated for both indoor and outdoor use, or armor...
