

Unit Price for Cable Tray Installation

Overview

Cable tray pricing varies significantly based on configuration: ladder-style trays (\$3-12/ft), trough systems (\$8-18/ft), and solid-bottom variants (\$10-25/ft). Industrial cable management pricing reflects these structural differences. Cable trays are vital in electrical installations, providing secure pathways for power, communication, and control cables across residential, commercial, and industrial settings. Basic cable tray systems cost \$3-15 per foot depending on type and material. Installation labor adds \$5-8 per foot to total project costs. Ladder trays typically cost 20-30% less than solid bottom systems. Bulk orders of 1000+ feet can reduce unit pricing by 15-25%. Regional variations can impact pricing. Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation. This guide breaks down everything buyers need to know, from price trends to cost-saving tips. The average cable tray price per meter ranges from \$2 to \$5. Cable trays are used in wiring of buildings to support electrical cables and wires that are used to distribute power, controls and communication. The price is based on standard length of the cable tray which is 2 meters. In power-heavy areas, they prevent failures that would be far more expensive than the tray itself. We offer complete kits to provide you with cable tray ready to install under new or existing raised floors based on the unique requirements at your facility.
