

Use pipes instead of cable trays

Overview

Use conduit for short, exposed runs, vertical drops to equipment, or areas needing extra protection. The hybrid approach delivers speed and flexibility without sacrificing protection. When installing a wiring system in place, a choice has to be made. You either go for conventional electrical pipes (or conduits) or the more ultramodern cable trays. This choice depends upon a lot of factors. What are cable trays?

Wireways and. There are special jobs that each option can have, depending on the number of cables and their positioning. Cable Load and Thermal Management 2.
