

Virtual Cable Tray Creation

Overview

With the Cable Tray Creator in Siemens Process Simulate, you generate precise 3D cable tray by clicking directly in the 3D view., 400 mm → 200 mm), click the route—even referenced to your layout—hit Create, done. Cable trays are virtual objects that help route cables, wires, and bundles across rooms, above machinery, or to support larger bundles. This saves serious modeling time and boosts collision checks. Quick and Accurate Generation of Cable Tray Sections and Feeder Cable Schedules. When pressed a new window appears. In this window you can specify the kind of setup you wish to use for your. My aim is to draw a line with the revit line command and use the dynamo script to draw the straight stretches and the curves according to the angles of the vertices.
