

Warranty warranty for PAM4 laser diode

Overview

45-day warranty for general customers (Exception: 30-day warranty for most of laser diodes, SOA modules, 40Gb detectors/receivers) 60-day warranty for resellers and for large qty of goods. Centurion+ systems and optics are guaranteed for 1 year. Warranty covers parts & labor. We can add extra 30 day warranty for some special goods which would take longer time to verify its long-term. MACOM offers high sensitivity PIN photodiodes with industry leading performance at speeds of 56Gbd / 100G. Proprietary designs enable operation using PAM4 modulation protocols in 50 /100G applications. The high responsivity designs have high reliability and are suitable for use in both. To enable us to process your request as quickly as possible, please fill in the form below. If the system is repaired at a Lumibird facility, shipment is paid one way. The HXT14400 is a quad-channel, low power, Linear PAM4 VCSEL driver for SR optical applications that supports signaling rates up to 28Gbaud or 56Gbps PAM4. In conjunction with an individual DFB laser diode, the device handles the complete digital-to-optical conversion, including CML input with. The Marvell Ara PAM4 DSP is a next generation solution for GenAI and cloud datacenter interconnects utilizing pluggable transceivers. Ara features eight 200Gbps/channel PAM4 host electrical interfaces, and an octal 200Gbps/lane PAM4 optical interface with integrated high-swing laser-modulator.
