

Western European cable tray models

Article Overview

Western European cable trays are available in diverse types including ladder, perforated, wire-mesh, and solid trays, made from galvanized steel, stainless steel, or GRP, suitable for industrial, commercial, and marine applications.

Key Manufacturers and Models

Eurostrut offers cable trays designed for industrial and marine use, including distribution trays, cable routes, and NATO-type models. Their trays are made from hot-dip galvanized steel or stainless steel, with open or perforated designs to reduce overheating, and are available in various widths, heights, and configurations for flexible installation. Eurotray Support Systems provides trays capable of carrying heavier cable loads, suitable for vertical applications, raised floors, and environments requiring high hygiene standards, such as data centers and food manufacturing plants. Their systems include all necessary mounting, connection, and grounding components, ensuring safe and compliant installations. DKC Europe is a leading supplier of cable tray systems across Europe, offering solutions for civil and industrial infrastructures, including energy protection, transport, and distribution systems. Their product range supports both low and medium voltage applications. Wibe Group manufactures a variety of trays:

- W1: Non-perforated tray for C1 and C2 environments
- W3: Perforated tray for improved airflow, suitable for C1-C4 environments
- W4: Perforated mounting tray for vertical or horizontal installation
- GRP trays (Mita Flex): For highly corrosive environments These trays come in multiple side heights and surface treatments, offering flexibility for industrial and c...
