

What are some optical fiber cable factories in Samoa

Article Overview

Samoa does not currently have domestic optical fiber cable manufacturing factories; fiber-optic infrastructure relies on imported cables and regional submarine cable projects.

Overview of Fiber-Optic Infrastructure in Samoa

Samoa's fiber-optic connectivity is primarily supported by submarine cable systems rather than local manufacturing. Key projects include:

- Samoa Submarine Cable Company (SSCC): Operates the Tui-Samoa and Manatua submarine cables, connecting Samoa to Fiji, Wallis and Futuna, and other Pacific islands. SSCC focuses on providing high-speed internet and digital services but does not manufacture fiber-optic cables locally .
- ASH/SAS Cable Systems: The America Samoa Hawaii (ASH) Cable and Samoa-American Samoa (SAS) Cable link Samoa to American Samoa and Hawaii, enabling inter-island and international connectivity. These projects utilize imported fiber-optic cables and landing stations in Apia, Pago Pago, and Hawaii .
- Samoa National Broadband Highway (SNBH): Managed by the Ministry of Communications and Information Technology, SNBH connects schools, hospitals, and government offices using fiber-optic cables and microwave backhaul. The network relies on imported fiber-optic cables and local installation services rather than domestic production
