

What are the 5 types of tools for fiber optic cable termination construction

Overview

When it comes to professional fiber installations, tools can be grouped into five main categories: cutting and preparation tools, splicing tools, cleaning and inspection tools, testing tools, and auxiliary equipment. Let's take a look at the common types of tools you may encounter in an installation. If you're just starting out, use this as a jumping off point to see how each tool works. We. Fiber optic tools are specialized instruments designed for installing, terminating, splicing, testing, and maintaining fiber optic cables. Unlike copper cabling, optical fiber requires precise handling, clean end faces, and accurate measurement to avoid signal loss and performance degradation. Fiber Cleaver: A fiber cleaver is a fundamental tool used to create a flat and clean endface on the fiber.
