

What are the proper cable trays like

Article Overview

There are several types of cable trays used for electrical installations, including:

- Ladder Tray: Features two side rails with rungs, allowing for good ventilation and support for heavy cables .
- Perforated Tray: Similar to ladder trays but with a solid bottom and holes for ventilation, suitable for lighter cables .
- Solid Bottom Tray: Provides a solid surface for cable support, ideal for sensitive cables that require protection from dust and debris .
- Wire Mesh Tray: Made of welded wire, this type is lightweight and allows for easy cable management and airflow .
- Trough Tray: A solid-bottom design that is enclosed on all sides, providing maximum protection for cables .

These trays are selected based on factors like the number of cables, cable sizes, and environmental conditions .
