

What does Kenyan cable tray system include

Overview

Cable trays in Kenya include cable Trunking, cable ladder, perforated cable tray, wire mesh cable tray and the matching accessories, etc., which are often made with such materials as hot dip galvanized steel, galvanized sheet, stainless steel, aluminum alloy, Polyvinyl. Cable trays are structural cable support systems used to route, protect, and organize electrical, data, and communication cables. They offer ventilation, scalability, and low maintenance, making them superior to conduits for medium to large cable layouts. Our solutions ensure neat, safe, and reliable cable routing in industrial, commercial, and residential. Galvanized Cable trays are mechanical support systems. Cables are used to provide a rigid structural system for electrical cables, raceways, and insulated conductors used for electric power distribution, control, signal instrumentation, and communication. Available in Galvanized, Powder coated, or both. Seamless Process Automation Limited offers some of the strongest cable trays in Kenya and produces them to a very high structural and visual standard. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that.
