

What is a butterfly-shaped optical cable nail fastener

Overview

A wingnut, also known as a butterfly nut, is a type of nut with two sizable metal “wings,” one on each side, making it simple to tighten and loosen by hand without the use of any tools. It is a nut with an exterior surface that has been knurled and is also known as a knurled nut. Butterfly-shaped optical fiber cables are a popular type of fiber optic cable that is commonly used for data transmission in telecommunication networks. This clamp comprises two principal components: Reinforced nylon material body. These clamps provide a secure foundation for the cables, helping to prevent damage and maintain proper alignment and. 2-piece kit Fiber optical thermal stripper M8 & fiber optical cleaning clip compatible with bare fiber/bundle and ribbon fiber for 1-48 core dual heating mode and 8-level temperature regulation.
