

What is the white color of fiberglass cable trays

Overview

This is an E-1 color code (formerly known as a K-1 code) because it includes both a white and green conductor. As a result, this tray cable may not work for every situation. Per NEC guidelines, white is meant to serve as the neutral conductor, while green is only used. Depending on which end of the cable you're looking at, you can read the colors clockwise or counterclockwise from the center black conductor. Let's say you cut your cable and see this series of colors: black, white, red, green, orange, and blue, in that order and in a consistent pattern. FCT-03: Green color FRP cable tray. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transpos the enclosure. -piece tray istypically used in applications where visual esthetics are important. It is available with a ventilated or solid bottom. It is manufactured from fiber reinforced polyester or vinyl ester resin so it has high corrosion resistance, long. That's why the color-coding system in this catalog is designed to help you select products that fit your service needs. Products are marked to indicate the typical lead time for orders of 50 pieces or less. covers, or fittings so that I get the.
