

What types of 40GE optical modules are available

Article Overview

40GE optical modules are primarily QSFP+ transceivers, available in short-reach, long-reach, breakout, and multi-rate variants for diverse network applications.

QSFP+ Optical Modules

QSFP+ (Quad Small Form-Factor Pluggable Plus) is the standard form factor for 40GE modules, aggregating four 10Gbps channels into a 40Gbps link . Common types include:

- 40GBASE-SR4 QSFP+: Short-reach, multimode fiber, typically up to 100-150 meters, using MTP/MPO connectors .
- 40GBASE-LR4 QSFP+: Long-reach, single-mode fiber, up to 10 km, using LC connectors .
- 40GBASE-PLR4 / PLRL4: Extended long-reach single-mode modules, supporting distances up to 20-40 km .
- 40GBASE-ER4 / LR4L / LX4: Ultra-long-reach modules for single-mode fiber, suitable for metro or service provider networks .
- CSR4 / PIR4 / IR4: Variants optimized for specific short- to medium-range applications, often multimode fiber .

Breakout and Converter Modules

40GE ports can be split into multiple 10GE connections using breakout solutions:...
