

Where is the power distribution box

Article Overview

A power distribution box is typically located in accessible areas such as the basement, garage, utility room, or near the main entrance, and sometimes outside near the electrical meter.

Typical Locations

Power distribution boxes, also called electrical panels or breaker boxes, are usually installed in areas that are easily accessible for maintenance and emergency access. Common locations include:

- Basement: Often mounted on a wall near where the main power line enters the home .
- Garage: Frequently used in single-family homes for easy access and visibility .
- Utility Room or Closet: Provides a central location while keeping the panel out of sight .
- Hallways or Kitchen Areas: In apartments or multi-unit buildings, panels may be located indoors in hallways, kitchens, or bathrooms .
- Outside Near the Meter: Some homes have the main service panel mounted outside, close to the electrical meter for quick access by utility personnel .

Identifying Features

A power distribution box is usually a rectangular metal box, often gray, with a hinged door or removable cover. Inside, it contains circuit breakers or fuses, each labeled to indicate the circuits they control, such as “Kitchen Lights” or “Living Room Outlets”...
