

Which ceramic ferrule is the best

Overview

Zirconia ceramic ferrules are the top pick because they last long and do not change with heat in fiber optic networks. Pick the right ferrule type (PC, UPC, APC) for your network to help it work better. At Yixing City Kam Tai Refractories Co., Ltd, we totally get how important it is to choose quality materials tailored to what you need. This article will comprehensively introduce fiber optic ferrules, helping you understand their origin. They are made of zirconia ceramic, which offers the highest performance and durability of all ferrule material types. Our Custom Ferrules are designed to meet unique requirements for a wide range of. Ceramic ferrules and sleeves are often used in optical connectors, attenuators, fiber stubs, and other optoelectronics requiring low signal loss. Kyocera's extrusion molding process creates ferrules with excellent coaxiality, and our precision machining ensures excellent concentricity with precise. Two common ferrule materials—zirconia ceramic and lower-cost plastic composites—provide comparable performance and achieve compliance with TIA/EIA-568-B. 3 requirements (Insertion Loss <0).
