

Which manufacturer makes the best explosion-proof DC power supply unit

Article Overview

ABB, Siemens, and Trolex are among the top manufacturers of explosion-proof DC power supply units, offering high reliability, efficiency, and hazardous-area certifications.

ABB – CP-C.1 Series

ABB's CP-C.1 power supplies are designed for demanding industrial applications, offering up to 94% efficiency and a 50% integrated power reserve. They include overheat protection, active power factor correction, and a broad AC/DC input range. These units are ATEX and IECEx certified, making them suitable for hazardous areas where explosion-proof performance is critical. ABB's products are widely recognized for robustness, reliability, and global approvals, making them a preferred choice for professional DC applications .

Siemens – SITOP Series

Siemens' SITOP DC power supplies provide high operational reliability and are designed for process, automotive, and specialty machine industries. The portfolio includes modular and compact units with UPS capabilities, overload protection, and advanced diagnostics. SITOP units are suitable for industrial environments requiring continuous 24 V DC supply, and their modular design allows flexible expansion. Siemens emphasizes efficiency, plant availability, and integration with TIA Portal or PROFINET, making them ideal for complex industrial setups
