

Wiring of the intelligent monitoring module in the distribution box

Overview

This module is intended for power limited wiring only. Install module wiring in accordance with the job drawings and appropriate wiring diagrams. NOTE: Monitor module L (using terminals 6 and 7) responds at the. Product positioning Intelligent distribution box monitoring instrument, supporting real-time electrical data collection, energy consumption measurement and safety early warning. Background Traditional distribution boxes are difficult to implement remote monitoring due to. The Notifier FMM-1 is an intelligent addressable monitor module designed for use with Notifier's ONYX series and other compatible fire alarm control panels. Refer to the control panel installation manual for detailed system information. Dis-connect. The M501MA monitor module can be installed in a single gang junction box directly behind the monitored unit. Its small size and light weight allow it to be installed without rigid mounting (see Figure 1).
