

Xuyi patch cord fiber optic

Article Overview

Xuyi fiber optic patch cords are high-quality SC-SC patch cables designed for reliable, low-loss connectivity in data centers, telecom networks, and FTTH applications.

Overview

A fiber optic patch cord, also called a fiber jumper or patch cable, is used to connect optical devices such as transmitters, receivers, and terminal boxes, enabling seamless data transmission over fiber networks . Xuyi specializes in SC-SC patch cords, which feature dual SC connectors with durable ceramic ferrules, ensuring stable and precise connections . These cords comply with IEC/ETSI standards, providing resistance to environmental interference and consistent performance in professional applications .

Key Features

- Connector Types: SC-SC, suitable for direct device-to-fiber links; other Xuyi models may support LC, ST, FC, or MPO/MTP connectors .
- Fiber Modes: Available in single-mode (OS1/OS2) for long-distance transmission and multimode (OM1/OM2/OM3/OM4/OM5) for high-speed local networks .
- Cable Types: Simplex or duplex configurations depending on network requirements .
- Durability: Kevlar (aramid) strength members under the jacket enhance mechanical strength and handling resilience .
- Performance: Low insertion loss and low return loss for high-quality signal transmission, suitable for data centers, telecom systems, and FTTH deployments
